

Dear Parent/Carer,

As a way of continuously improving science education on the secondary campus at Abertillery Learning Community, I have developed a Virtual Learning Environment (VLE) using Google Classroom.

The VLE can be accessed via smartphone, tablet and PC, enabling students to complete work, homework, revision and eventually carry out end of topic tests.

In order to access Google Classroom all they need is a Gmail account and a unique code to log in.

The codes are as follows:

Class	Code
11X1	Wgb5nww
11X2	Ntx4ypl
11X3	5ocjfm
11Y1	91ysew
11Y2	M55a87f

Class	Code
10X1	5q5pbaz
10X2	4vwd6s
10Y1	Vfx4z5b
10Y2	Xij7e6

Individual learners know which class they are in, so they are required to simply use the code associated with their class.

You can help support the science department by logging in yourself and having a look at the work the learners should be completing. Deadlines have been stated next to the work that should be submitted.

Thank you for your support with this endeavour

Richard Cooper

Head of Science
