GCSE - NEW

3310U30-1

MATHEMATICS – NUMERACY UNIT 1: NON-CALCULATOR INTERMEDIATE TIER

WEDNESDAY, 2 NOVEMBER 2016 – MORNING 1 hour 45 minutes

ADDITIONAL MATERIALS

The use of a calculator is not permitted in this examination.

A ruler, a protractor and a pair of compasses may be required.

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer all the questions in the spaces provided.

If you run out of space, use the continuation page at the back of the booklet, taking care to number the question(s) correctly.

Take π as 3·14.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

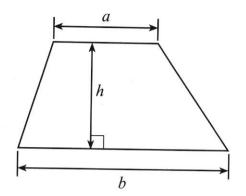

In question **2**(a), the assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing.

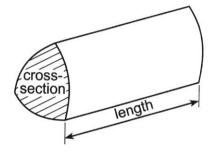

For Examiner's use only Mark Maximum Question Mark **Awarded** 3 1. 2. 8 3 3. 9 4. 5. 6 4 6. 7. 4 5 8. 9 9. 10. 7 8 11. 12. 9 13. 5 80 **Total**

Formula List – Intermediate Tier

Area of trapezium = $\frac{1}{2} (a + b)h$

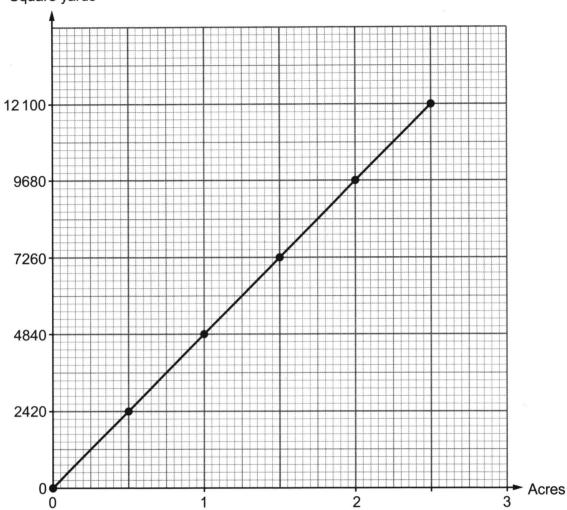

Volume of prism = area of cross-section × length

1. Marcus is a farmer.

He has his own conversion graph to change between acres and square yards.

Complete each of the following statements.

(a)	3 acres is equal to	square yards.	1]

(b)	5.5 acres is equal to	 square yards.	[2]

Examiner 2. Large bottle 500 ml for £1.25 Small bottle Medium bottle 300 ml for 66p 400 ml for 92p In this part of the question, you will be assessed on the quality of your organisation, communication and accuracy in writing. Roland is going to buy some orange juice for a party. Which size bottle of orange juice offers the best value for money? You must show your working. [3 + 2 OCW] Galina needs to buy exactly 800 ml of orange juice. (b) Which is the best option for Galina? You must show your working and consider all options. You must give a reason for your choice. [3]

8. The scale diagram opposite shows an Eisteddfod camping field.

The camping field is 100 metres long and 80 metres wide.

A river runs along the side AB.
There is a hedge along AD.
There is a fence along BC.
DC is an opening with access to the Eisteddfod camping field.

The scale used is 1 cm represents 10 metres.

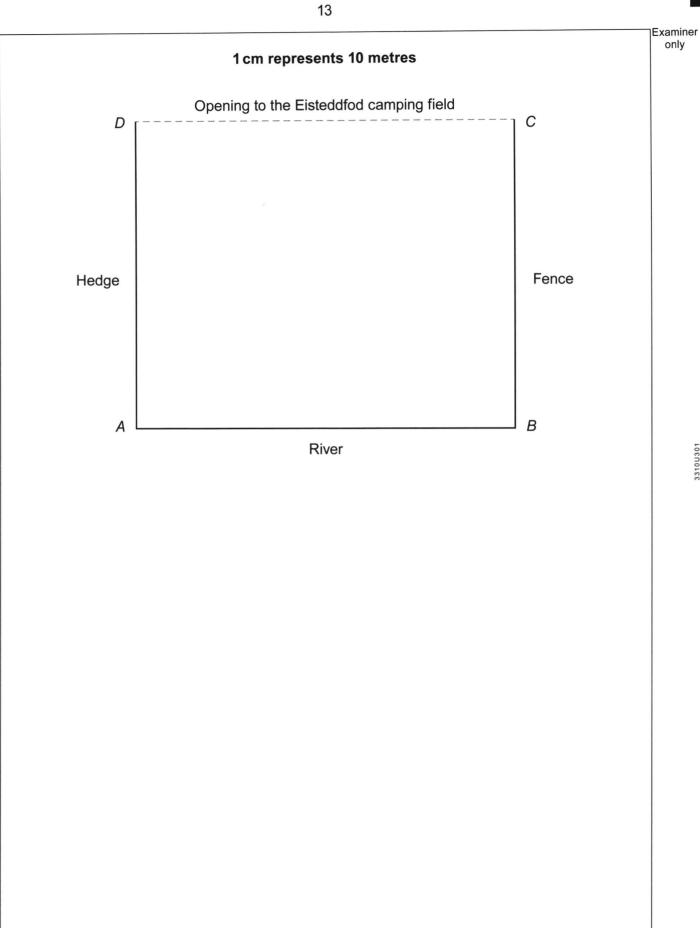

A barbecue area is to be built on the camping field.

The barbecue area must be

- nearer to the river than to the opening to the Eisteddfod camping field,
- nearer to the river than to the hedge,
- more than 30 metres from the corner of the field where the hedge meets the river.

Draw suitable lines on the diagram and shade the region where the barbecue area could be built.

Turn over.

9. (a)

Lotty and Rafael decide to enter a prize draw.

They agree to share any money they win in the ratio 2: 3 respectively.

After winning a total of £2000, they think again and decide that Lotty's share should be increased by 30%.

(i)	Rafael thinks that his share will be reduced by 30%. Without any calculation, explain why Rafael's thinking is incorrect. [1]
(ii)	Calculate the amount of money Lotty wins after the decision is made to increase her share. [4]

Find the ratio that is now used to share the money between Lotty and Rafael. (iii) [3] Express your answer in its simplest form. Lotty's winnings : Rafael's winnings =: In another prize draw, it was planned to give £5000 as the first prize. To make it more popular, the organisers decide to increase this first prize by 26%. The most efficient method of calculating the amount of the increased first prize is 1.26×5000 . The second prize was planned to be £3000, but it is now decided to decrease this prize by 6%. Write down the most efficient method of calculating the amount of the decreased second [1] You are not expected to work out the answer.

10.

Stylish computer desk

Made of laminate wood. Non-scratch top.

Length is exactly 2000mm

Luc wants this new desk for his bedroom.

The desk is to fit on the straight wall between his wardrobe and his bookcase.

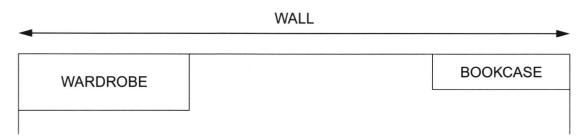

Diagram not drawn to scale

Luc has measured the length of

- the wall, which is 600 cm, correct to the nearest 10 cm,
- the bookcase, which is 147 cm, correct to the nearest 1 cm,
- the wardrobe, which is 250 cm, correct to the nearest 1 cm.
- (a) What is the greatest possible length of the wall?Circle your answer.

600 cm 605 cm 645 cm 610 cm 650 cm

(b) What is the least possible length of the wardrobe? Circle your answer.
